

## **Appendix D**

### Sampling Trip Field Notes

Node 21 - coordinates

$$\frac{24}{60} + \frac{57.62}{3600} = 0.4 + 0.016 = 0.416$$

$$\frac{13}{60} + \frac{43.55}{3600} = 0.2167 + 0.012 = 0.2288$$

### Conditions of sampling

- light rain increase to heavy rain
- worked from 10-12
- Sleat

### Deviations

#### Safety

- wet, rain eliminated dust issues so we wore booties
- Bero & Eric didn't wear
- samples 2.1-2.5, 2-5, 10, 15, 2.0 were sampled before lunch & left in place \*
- rain prohibited writing ID #'s on flags
- Used GPS to find 2.1 - start point
- Manually ID'd remaining points
- Slight deviation from PS TO P1 (sample P1 is approx 30-40 ft N of where it should be)
- GPS for each sample point taken

Scale: 1 square = \_\_\_\_\_

- 8, 12, 14, 18 eliminated due  
to conditions

- 1, 2, 6, 11, 16, 7, 9, 13, 17, 19  
taken after lunch in  
heavy rain

Sample ID procedure:

prepared Node #'s on plastic bag  
w/ Sharpie

- placed inside sample bag

- samples returned to van, dried  
on outside w/ paper towels

- outside of bag relabeled  
to ensure integrity

Vegetation

Scale: 1 square = \_\_\_\_\_

*Plot in the rain*

1-21-17

GN30
