MealsMyWay

Team Mentor: Paul Deasy

Team: Isaiah Swank, Maximilian Poole, Laura Guerrero, Colin MacDonald

Client: Ana Paula Chaves, Northern Arizona University, Flagstaff, AZ

Motivation

MealsMyWay streamlines meal planning by suggesting recipes based on ingredients in users' pantries. Meal Prepping:
- Healthy Lifestyle
- Saves Time
- Reduces Waste

However, it can be overwhelming to manage recipes, meal plans, and grocery lists all on your own. MealsMyWay offers a social sharing solution to help with these concerns.

Key Features

- Personalized Adjustable Calendar
- Customize or Create Recipes
- Generative Pantry/Freezer Management
- Grocery and Prep List Generation
- Shareable Meal Plans
- Automated Recipe Suggestion

Architecture

Technologies

Current Status

We are beginning the development stage of our web application. This involves designing the site, hosting it, and creating and populating the database. Once those tasks are complete, we will connect them to ensure seamless integration of our technologies. After that, we will focus on the mobile application view of our project to ensure a quality user experience on both the web and mobile sides.

Future Work
