

<i>FUGU</i>	Weekly Team Task and Status Meeting Report	Report #6
-------------	---------------------------------------------------	------------------

Team Fugu	Meeting Date: 2004.03.02
Project Title: OpenBSD Tools	
Team members present: All (Erik, Nauman, Thad, Ben)	On- time: All (Erik, Nauman, Thad, Ben)

Progress of Team Meetings

- a) last meeting(s): 2004.02.25, 02.27
- b) next meeting(s): 2004.03.03, 03.05
- c) Communication Problems: None.

Last week's Tasks: Status

Task Title: Functional Specification	Task Initiation: 2004.02.23	Orig. Due Date: 2004.02.28	Status: Submitted
Who (%): All team members			
Description: Document describing function of programs			
Progress: Submitted			
Task Eval: Met with Dr. Doerry for suggestions on how to improve draft prior to finishing final copy, so we expect final version should be good.			

Task Title: Peer evals	Task Initiation: Various	Orig. Due Date: 2004.02.28, delayed to 2004.03.01	Status: Complete
Who (%): Each team member			
Description: Peer evals for functional spec phase			

Task Title: Coding styles guidelines	Task Initiation: 2004.02.23	Orig. Due Date: 2004.03.01, delayed to 2004.03.03	Status: Complete
Who (%): Erik: 30%; Nauman: 30%; Ben: 25%; Thad: 15%			
Description: Standards for team coding			
Task Eval: Straightforward and quick. Hopefully now we can get coding.			

Task Title: Test machine setup	Task Initiation: 2004.02.24	Orig. Due Date: None	Status: Complete
Who (%): Erik: 40%; Nauman: 20%; Ben: 20%; Thad: 20%			

Description: Set up a group Sparc64 and 4 individual i386 test machines in Erik's office, for local and remote project work.

Task Eval: The machines are set up. Next phase is patching; see below.

This week's Tasks: Work plan

Task Title: Patch BSD machines	Task Initiation: 2004.02.20	Orig. Due Date: 2004.02.28 (delayed)	Status: In Progress
Who (%): Everyone			
Description: Patch kernel, compile kernel, and build distro for each individual on their machine.			
Progress: Not yet completed.			

Task Title: Installation flow chart	Task Initiation: 2004.02.09	Orig. Due Date: None	Status: In progress
Who (%): Ben			
Description: Ben has volunteered to make a flow chart representing the existing OpenBSD installation procedure so that we have a visual guide for what our installation procedure needs to do.			

Task Title: Software Design Specification Document	Task Initiation: 2004.03.02	Orig. Due Date: 2004.03.12	Status: In progress
Who (%): All team members			
Description: Detailed design specifications document			

Task Title: Tool study	Task Initiation: 2004.02.25	Orig. Due Date: None	Status: In progress
Who (%): All team members, emphasis on Erik and Ben			
Description: We are looking for more specific tools – shell scripting sed & awk, Perl, Ncurses, ISO & FS extraction/creation, and others – for how best to design our tools.			
Ncurses is probably out as GUI has been dropped to bottom priority. Progress has been made in ISO and FS extraction and creation. At this point it looks as if we'll stick to the original shell scripting for installation and Perl for patching.			

Upcoming Tasks: Planning

Task Title: Logo selection	Who (%): Thad, Ben	Rough Due Date: By next presentation date
Description: We should have a project logo, presumably a fugu. Adapting from other OpenBSD logos is a start, but we'd like to find an artist to draw an original logo all our own.		
Progress: Design has been pushed back in favor of other priorities.		

Task Title: T-shirt design	Who (%): Thad	Rough Due Date: By capstone presentation day
Description: Tangential to project, but once logo is selected, FUGU T-shirt (parody of "FUBU" line) should be easy to generate. Intend to use 99dogs.com.
