

# Meeting Minutes

## GRID CONNECTED T-TYPE CONVERTER

For our meetings, our team has set two three hour sections per week for the entire semester and therefore we can say we have at least 360 minutes per week.

Our team was meeting at the School of Informatics, Computing & Cyber Systems building. As for how the meetings are run, we were given assignments to do every meeting by our client and we have our mentor to help us understand what we do not know already.

In the case where we did not manage to finish our task on time, we split the tasks on each individual during those times.
