

**Attendees:**

Darby DeGan  
Sean Conlin  
Mr. Lehman  
Hamad Aldosarry  
Hunter Browning

**Start Time:** 10:38 am

**End Time:** 11:10 am

**Next Assignment Talking Point:**

Next assignment is the design document. Already have most of the information for that. Focus of the meeting is going to be ordering parts and MAQ20 questions.

**Notes:**

- ISO3080 Communicates with MSP430 via UART
- \$300 for non-Dataforth products.
- Aesthetics are not important as of now, can be added later if we want
- Using ISO3060 (Dataforth part # IC2189-002) now as that is what Dataforth has to give to us
- Hunter has the excel sheet to send to Mr. Lehman for all parts needed.
- Programming and purchasing will be done over the winter break
- Begin integrating and troubleshooting January-March
- Where to put temperature monitors for Health of System
  - Can be figured out later
  - Using IEEE standards for temperatures
- Send design document/presentation to Mr. Lehman along with link to our website

**Next meeting:**

Focus on starting to build the system and code MSP430. Meeting over winter break around New Years as a touch base
