

December 7, 2012

Jim Clark  
Naval Precision Optical Interferometer (NPOI)  
447 Lake Mary Road  
Flagstaff, AZ 86001

Dear Jim Clark:

Following up on our meeting, I look forward to meeting with you and Mr. Winchester in the following months. Attached is our final project proposal. In it, you will find the final design description, drawing, and materials selection.

Our goal is to provide you with a fully operational, automated siderostat cover. We would like to have it installed at NPOI by the middle of May, 2013. The final design is the Iris Diaphragm that we have previously discussed with you.

We anticipate having a working scale model on or before February 18, 2013. The final installable prototype will be produced on or before April 30, 2013. We do not anticipate any budget issues and should be able to complete this project meeting the allotted \$500.

Sincerely,

Leland Doyle  
Team 8
