Baja

Concept Generation and Selection

Fahad Alajmi, Sean Collins, Peng Li, Auston Solway, Maximillian Whipple, Jingyuan Zhang

Srinivas Kosaraju Oct. 21,2015

Introduction

- Dr.Kosaraju requested the development of the rear suspension, clutch mechanism, and transmission by 15 NOV.
- The vehicle must comply with SAE Baja 2016 rules and must be fully operational by March 1st, 2016.
- The Quality Function Development identified multiple engineering and customer requirements.

Criteria

Rear Suspension

- 1. Travel
- 2. Deflection
- 3. Durability
- 4. Cost
- 5. Maintenance/Repair

<u>Clutch</u>

- 1. Durability
- 2. Maintenance/Repair
- 3. Starting Torque
- 4. User Friendly
- 5. Cost

<u>Shifter</u>

- 1. Degrees of Throw
- 2. Shifting Speed
- 3. Shifting Force
- 4. Cost
- 5. Simplicity

Conclusions:

- Functional Diagram is helpful to the presenter to, to know how the baja is work, and what the main sources of energies used in.
- Criteria and Relative Weights of Criteria: helps us evaluate criteria importance
- Concepts: suspension, clutch, and shifter
- Decision Matrices of Concepts: use the weighted criteria we developed to evaluate our concepts
- Updated project plan: timelines that have changed
