

## Meeting Minutes (02-15 and 02-18)

Date: 02-15-17

Start: 4:00 pm

All members in attendance

4:00

- Work distribution
  - Arduino code: Ernes
    - Code to control the motor using buttons
  - Wooden table Vs. High chair table: Sammuell and Mohammad
  - Refunds: Abdulrahman and Abdullah

4:30

- Discussed hardware review
- UGRADS Registration work distribution
  - Setting up a rough draft
- Midpoint Review Work distribution
  - Change report to past tense

4:50

- Discussed about renting tools from home depot
- Made agenda for next meeting
  - Agenda: Finish coding and attach table to car
  - Next meeting: 2:00pm on

End: 5:00 pm

Date: 02-18-17

Start: 2:00 pm

Missing Mohammad (Out of town for the weekend)

2:00

- Tested code with the buttons
- Discussed where the arduino would be attached in the car
  - How the wires will run inside the frame of the car

2:30

- Discussed how the table will be attached to the car
  - Led to a design change. The table will be morphed into two static armrests that will house the buttons. These armrests will lay right on top of the side of the car.

3:30

- Began to construct the model
  - Armrests were shaped using an electric saw and a drill was used to construct holes for the button.
  - Purchased nuts, washers, and bolts.
  - The side of the car was cut to house the button and drilled for bolts.
  - Armrests were attached to the car
- Future agenda: Finish model to begin testing testing.

End: 6:00 pm
