

Team meeting Oct 4

7:00-8:20 pm

Group overview:

- Brought over our designs to share to each other
- Each had five designs to demonstrate with three relating to animals

Animal generation iteration:

1. Toucan beak
2. Crab Claw
3. Squid tentacle
4. Poison ivy vine hand

Goal of the day:

- Started generation design.
- Start black box and functional model
- Narrowed down our top four designs
- Reviewed and rated some aspects of the attachment options for our design. This sheet will be added to excel and expanded with new information
- Felicity brought over the design from her Enable Chapter to give the team a better understanding of how the wires and gears will be attached to make it functional.

Future and goals:

- Janelle will begin to work on design for black box and other requirements.
- Each member is to submit a bio and pic of themselves to Janelle for the website and report. As well as scan in their designs
- Next meeting is next Thursday.
- Everyone is to begin their part of the report at this time
