

Smart Helmet

By: Omar Alomar, Fares Alotaibi, Mana Alyami, Race Oshiro, and Titus Yazzie

Project Description

- Client: Dr. Hesam Moghaddam
- Based on Client Requirements Team will use:
 - Laser Sensors, Linear and Angular Accelerometer
 - Bluetooth Transmitter, Memory Card
- Implement for wide range of helmets
- Focus on improving the safety

CAD Models

Figure 2: Scanned Helmet Shell

Figure 3: Arduino Inner Mount

Figure 4: Arduino Laser Mount

Current State Of Project

Figure 5: Testing Apparatus

Figure 6: Current Arduino System

Current State of Project Continued

Figure 7: Helmet Shell With D30 Material

Update Accomplishments

- Arduino codes
- Laser sensor
- Gyroscope sensor
- Bluetooth and SD card
- D3O material
- Testing device

Update Changes

Accelerometer

- Linear Acceleration
- Changed due to g-forces

Figure 8: Arduino Accelerometer

Figure 9: New Accelerometer

Update Changes

Gyroscope

- Gyroscope and Accelerometer
- Angular acceleration
- Detect a quick rotation
- Changed due to safety

Figure 10: Gyroscope

Update Changes

- D3O material changed due to quality issue

D3O 2mm Solid Sheet 10"x14.5"
(AERO) Skived

D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with high shock absorbing properties.

D3O foam sheets can be cut to size and applied to the body as an under-wrap to provide added protection to contusions right on the sideline. D3O foam is soft and flexible and can be cut to any shape to match your specific needs.

Add D3O's patented impact protection to existing equipment by cutting your own padding. D3O foams are made from cutting edge smart molecules that remains soft and flexible until force is applied causing the material to seize up and bind together providing uncompromising impact protection.

D3O set solid and mesh sheets reduce up to three time as much force as similar foam padding without the added bulk. Only 2mm of solid D3O AERO out performs 20mm of EVA foam in transmitted force testing by up to 40%.

To learn more about D3O foam sheets and to get a glimpse at the raw testing

Figure 11: 2mm Sheet

D3O 6mm Mesh 10.5"x15" Sheet (XT)

D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with high shock absorbing properties.

D3O foam sheets can be cut to size and applied to the body as an under-wrap to provide added protection to contusions right on the sideline. D3O foam is soft and flexible and can be cut to any shape to match your specific needs.

Add D3O's patented impact protection to existing equipment by cutting your own padding. D3O foams are made from cutting edge smart molecules that remains soft and flexible until force is applied causing the material to seize up and bind together providing uncompromising impact protection.

D3O set solid and mesh sheets reduce up to three time as much force as similar foam padding without the added bulk. Only 6mm of solid D3O XT out performs 20mm of EVA foam in transmitted force testing by up to 70%.

To learn more about D3O foam sheets and to get a glimpse at the raw testing data click the link below.

Figure 12: 6mm Sheet

D3O 10mm Solid Sheet 10"x14.5"
(AERO) Unskived

D3O uses patented, patent-pending and proprietary technologies to make rate-sensitive, soft, flexible materials with shock absorbing properties.

D3O foam sheets can be cut to size and applied to the body as an under-wrap to provide added protection to select body parts or to contusions without leaving the field for more than a few seconds. D3O foam is soft and flexible and can be cut to any shape to match your specific needs.

Add D3O's patented impact protection to existing equipment by cutting your own padding. D3O foams are made from cutting edge smart molecules that remains soft and flexible until force is applied causing the material to react on the molecular level by seizing up and binding together providing uncompromising impact protection.

D3O set solid and mesh sheets reduce up to three time as much force as similar foam padding without the added bulk. Only 4mm of solid D3O AERO out

Figure 13: 10mm Sheet

Update Changes

- Ultrasonic changed to laser sensor
- Laser sensor gives more accurate data than Ultrasonic

Figure 14: Ultrasonic

Figure 15: Laser Sensor

Update Changes

- Bluetooth and SD Card
- Identify which sensor is better

Figure 16: Bluetooth

Figure 17: SD Card

Moving Forward

- Analytical Analysis
 - Omar: Buckingham Theorem, Impulse Equation
 - Titus: Angular Acceleration

Moving Forward

- Fares: Testing Laser Sensor Range
- Mana: ASTM Testing Procedure

Figure 18: Graph results

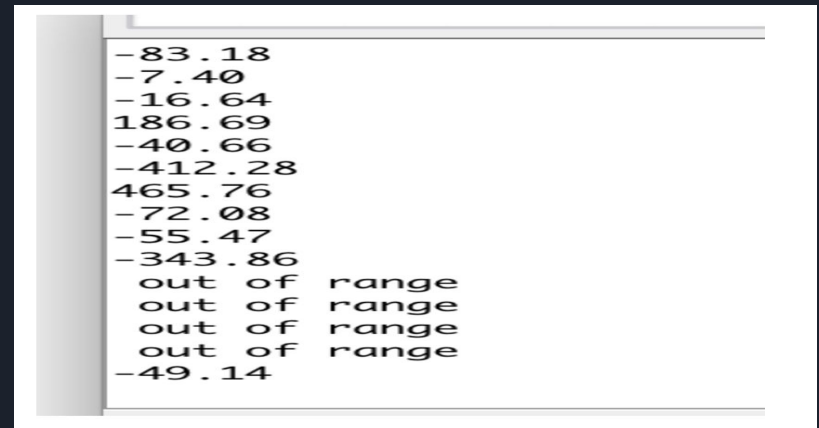

Figure 19: Data results

Moving Forward

- Race: Transmission of data, Bluetooth, Xbee, Wifi

Figure 20: Bluetooth Low Energy Breakout Board

Manufacturing and Testing

- Team will work understanding the code and plan out wiring for the various sensors
- Compile the code for the various parts
- Combine arduino parts into a complete system
- Mount arduino system to helmet
- Mount helmet to testing device to validate sensors
- Finish mounting padding to helmet shell
- Compare the D30 material to other padding materials

Budget

Table 1: Current BOM

| Part # | Component Description | Quantity | Cost \$ | Ref. |
|--------|-----------------------------------|--------------|---------------|------------|
| 1 | Testing Helmet | 1 | 19 | [1] |
| 2 | Viscoelastic | 1 | 30 | [2] |
| 3 | D3O | 2 | 127.6 | [3] |
| 4 | Laser Sensor Arduino | 1 | 13.93 | [4] |
| 5 | Laser Sensor VL53L0X | 1 | 3.56 | [5] |
| 6 | Data Memory | 1 | 19.99 | [6] |
| 7 | RTCSD-01 | 1 | 17.95 | [7] |
| 8 | Bluno Bee (Bluetooth Arduino) | 1 | 9.9 | [8] |
| 9 | Triple-Axis Accelerometer 8g | 1 | 7.95 | [9] |
| 10 | Xbee Shield | 1 | 9.9 | [10] |
| 11 | Arduino Uno | 1 | 19.99 | [11] |
| 12 | Accelerometer 3- Axis sensor 200g | 1 | 24.95 | [12] |
| 13 | Triple- Axis Gyroscope | 1 | 12.5 | [13] |
| 14 | Mannequin Head | 1 | 5.29 | [14] |
| 15 | Wood | 4 | 28.03 | Home Depot |
| 16 | Arduino | 1 | 60 | [15] |
| | | Total | 410.54 | |

Schedule Of Spring 19

| Task Name | Start | Finish | Assigned To | Duration | Q1 | | | Q2 | | |
