

Date: October 30, 2018

Time: 5:50 - 6:10

Type: Staff

Goals:

Consider a catamaran design as opposed to a basic RC boat, research of cost and convertibility. Research will be done regarding the motor. This includes the required power and resulting velocity. Also, considerations of how to locate motor(s) in order to accurately steer a catamaran. Grabber designs must be made specifically for a catamaran design. Plans for first purchase being bulk ping pong balls in order to begin preparation for testing.
