

Date : November 20, 2018

Time: 2 - 2:30 pm

Type: Team

Goals:

Jake began designing modifications to boat hull. Will continue designing modifications as well as prepare to order the boat.

Stephen finalized grabber design. Will continue CAD modelling the grabber for the CAD package for future printing and presenting.

Salman continued research of solar cell products. Will continue research considering efficiency, cost, and size.

Mohammad continued motor research. Will continue researching motors considering energy needed, speed, torque, and size.

Nader researched products of thermal cameras. Will continue researching product options.
