

Date : November 6, 2018

Time: 5:30 - 6:00

Type: Staff

Goals:

Jake researched catamarans costs and specifications for comparison to the previously researched boats. Will continue to research model catamarans with purchasing one in the coming week or two.

Stephen continued designing the ping pong ball collectors shape, material, as well as smaller details to the grabbers body. Will continue designing the collection device with a final design decided in the next week.

Salman researched options for solar panels as well as their individual sizes, efficiencies, and costs. Will continue researching alternative products for comparison. As the team is referred to as the "Garbage Patch Kids", will reach out to Topps marketing department to see if interest in sponsoring the project for advertisement.

Mohammad researched costs and popularity of motors and rudders. Will continue research of alternate models as the team has considered swapping the motor (and rudder) if applicable to boat design for a more efficient and less powerful motor.

Nader was not present at meeting due to health (flu). However, has been researching options for locating the ping pong balls. Will continue research of current options as well as alternate options.
