

Date : December 6, 2018

Time: 2 - 2:30 pm

Type: Team

Goals:

Jake CAD modelled major system components. Will continue designing modifications to boat as well as automatization of the system.

Stephen worked on grabber CAD. Will continue CAD modelling of grabber due to ongoing issues to look to print and test.

Salman submitted form for purchase of boat and solar cells. Will await arrival of cells in order to test. Will consider reaching out to garbage patch kids for support.

Mohammad shopped motors. Will continue shopping motors for 3 scenarios (motor to navigate, motor to collect ping pong balls, and a motor for the camera).

Nader shopped thermal cameras. Will continue shopping thermal cameras and consider how to automate the system.
