

Date: September 18, 2018

Time: 5:50 – 6:10

Type: Staff

Goals: Reach out to our initial client, Perry Wood. Project has been detailed more as creating a prototype of a device to clean up large trash in the ocean. This will be modelled as an automatized, solar powered, RC boat, that can identify and locate ping pong balls (model of large debris) to be collected. Switched meeting time to Thursdays at 5:15 due to conflicts.
