10:00AM-end	We talked to Dr.Moghaddam about our final ideas about the design and we showed him what we have ordered. He has approved the design before except one part that he didn't really like which was the way the device would go in and out of the trunk. We gave him other ideas and we made a little alteration and he approved the final idea. We also asked him question about our design that we need an answer to like how many time do we have to deploy the pneumatic cylinder to rise the telescoping hanger in one ride.	Dr.Moghaddam's office
