All team members & Jason

Time: 3:40-4:30

Location: ENG building

Executive summary

We are meeting today with Jason our advisor for this project to discuss about the project. Jason has provided as with customer needs. Which are the design should be light in weight and simple. It should not touch the body. Jason gave instructions about the project and how he wants it

To accomplish

1. Brain storm for ideas to present.
2. Figure out the right spring to use.
