

GROUP 1 STIRLING COOLER  
MEETING MINUTES  
Client meeting: SEP14, 2018

Member present: Luis, John, Ahmad

Announcements:

Client input: Dr. Trevas asked about the team progress. Also, he discussed a few ways to build our free piston Stirling cooler. One of his suggestions was to use gas spring instead of compression springs. Dr. Trevas talked about different types of materials that we could manufacture our design of.

Individual Progress:

Each of the team member is working on the individual assignments in order to have it early and use it ASAP.

Future Direction:

Prepare for the progress presentation. Finish up the cad package and bill of materials to present it to the client and class.
