

GROUP 1 STIRLING CRTOCOOLER
MEETING MINUTES
Group meeting: NOV14, 2018

Member present: Luis, John, Ahmad, Faiez, Abdulrahman

Announcements:

The team met at the machine shop to work on finishing the final testing proof to meet with Dr.Oman this week.

Team input:

The team met Wednesday worked on the frame of our apparatus. We have decided to have the system vertically oriented instead of horizontal. Unfortunately, the system did not cool and needed some minor adjustments. Due to that issue, our meeting with Dr.Oman was postponed to the 28th of this month.

Future progress:

As a team we will be meeting next week to try to solve the issues we faced while testing our apparatus.
