

GROUP 1 STIRLING COOLER
MEETING MINUTES
Group meeting: NOV9, 2018

Member present: Luis, John, Ahmad, Faiez, Abdulrahman

Announcements:

Individual input:

Ahmad: built aluminum caps for the cooler

John: building the aluminum motor housing

Abdulrahman: has a lab on the time of the meeting so he is working on the website

Luis: worked on the heat sink plate to punch holes into it.

Faiez: worked on the mill to flat a couple aluminum plates that will be used.

Future progress:

As a team we will be meeting this weekend to put all the parts together at John's shop. Once part assembly is completed, we will be running a few tests to see if the system will cool enough or if it needs more minor adjustments. Draft of poster and manual operation are done and waiting for a feedback for it.
