

## Meeting Minutes

**Date: 8-2-2018**

**Time: 04:15-9:20 PM**

**Attended: All Team Members**

**Topics:**

1. Final Testing Proof Resubmission
- 

### **Executive Summary**

This meeting was arranged to work on the final testing proof feedback given from Amy while presenting the poster. The work has been divided between the group members equally. However, each team member participated on the testing procedures for the hope device to make sure all engineering requirements have been met.

### **Final Testing Proof Resubmission Meeting**

The team gathered to discuss the feedback provided from Amy who is the TA of this class for the final testing proof. Amy recommended us to resubmit the testing proof assignment again due to some missing parts like the table of engineering requirements, bill of material table and the Factor of safety for the chest was under 1 which is unsafe when using the device. Every team member got the feedback of this assignment and participated on the testing procedure of this project. Furthermore, the team gathered and everyone worked on the missing parts that Amy indicated to add them in order to get better grade for this assignment. After that, the team sat together to check everyone's work to make sure everything was right by following the feedback given by Amy. Finally, after applying the feedback provided for the final testing proof, the team submitted this assignment.
