

Meeting Minutes

Date: 8-6-2018

Time: 12:30-2:00pm,06:00-11:00 PM

Attended: All Team Members

Topics:

1. Final CAD Package
-

Executive Summary

This meeting was arranged to work on the final CAD package. The work has been divided between the group members equally. However, each team member participated on the final report for this project by following the grading rubric.

Final CAD Package Meeting

The team gathered to apply the final touches on the CAD package to make it more professional and more detailed in depth as it was required from Dr.Oman and Amy. The team added belts to the chest to enhance the safety for the user. Also, the team added another roller connected with the chest supporter to enhance the balance of this device. Frthermore, thickness and dimensions have been adjusted to meet the engineering requirements such as safety, weight and height of this device. Finally, the team submitted this assignment with the time aligned successfully.
