

Meeting Minutes

Date: 7-30-2018

Time: 11:50am-2:15pm,04:00-9:15 PM

Attended: All Team Members

Topics:

1. Final Testing Proof
-

Executive Summary

This meeting was arranged to work on the final testing proof. The work has been divided between the group members equally. However, each team member participated on the testing procedures for the hope device to make sure all engineering requirements have been met.

Final Testing Proof Meeting

The team gathered to discuss the feedback provided from the client who is Dr.Oman and Amy who is the TA of this class for the final testing proof. Every team member got the feedback of this assignment and participated on the testing procedure of this project. Two ways of testing have been done for this project, which are hand calculations and Finite Element Analysis. Furthermore, the team gathered and everyone combined the section he did with other team members sections into the assignment paper. After that, the team sat together to check everyone's work to make sure everything was right by following the feedback from the client. Finally, after applying the feedback provided for the final testing proof, the team submitted this assignment on the time specified.
