

Week 9

All team member attended

The team met all together and we discussed together what we are supposed to do in this semester because we are facing a high quality work for our project so we talked about to start the first step for manufacturing and collect all the materials starting from next week to start build at least the base which is the track to do it 6 meters by 4 meters rounded with getting all the edges with a good curved.

Week 10

All team attended

The group member met at the engineering building, we discussed what we will proceed according to what the clients and professor Sara discussed with us. We will try to get in to the machine shop to start training in the field of using the equipment's and the tools to work on our project.
