

Meeting Minutes: Week 15

Attendance: All group Member

We are meeting at the engineering building to discuss about our project, and how we should build it. We are thinking to contact with several machine shops after that will check what is the best offer and availability based on time. That was one of task today the other tasks are review the final report each team member's take a few parts to complete the report rubric, and we will go through the note that professor Sara told us about the first report. Also, we are working on the final CAD and bill of materials. The final prototype is done before the meeting. We almost done from everything.
