

## Week 6 Meeting Minutes

All group members attended

---

This week the team have had an online discussion because week 6 was the week of midterms, and we actually have done a class meeting. So the team instead worked online of generating some more ideas to fulfill each one of u's tasks. Most of this meeting was focusing on how should we start our first draft of the final report. Some of the group members started working on the report, and within that time, we asked each other's questions that we needed an answers for. Some of those questions were needed to be asked to the Dr. Sarah because they were regarding the report. And the question was, "Do we have to set our final decision on the design and thereafter we cannot change?" the answer from Dr. Sarah was "No because it will be fine."
