# Team Meeting

## ***Attended meeting:***

- Saood Alazmi
- Ahmad Almuhanha
- Conor Rich
- Michael Torres
- Lucas Veteto
- David Trevas
- Amy Swartz

## **Discussion:**

Start making equations for thrust, center of gravity and ideal dimensions of the plane. For each person to determine the necessary equations to determine the best design with respect to each individual's research.

## **Next week expectations:**

Each member must continue researching a component of the plane and discuss it to the team on the next meeting. Try to understand the center of gravity of the airplane. Also to learn anything that will benefit to design and competition.
