

Team Meeting #3: 11am 02/06/2018

- Collect solar cells from Michael Shafer's lab.
- Begin construction of 2-panel solar configuration.
- Research: data sheets for proper resistance and voltage for secure solar hook-up of the provided solar cells from Michael Shafer

- Research: Arduino to solar cell connection
- Look into LabVIEW as a potential VI for recording and analyzing solar input data.

- Look into the Arduino code and readout programs

- Dakota: ahead of schedule of website 1 task, needs meeting minutes and headshots for the group.
- Give Andres, Fahad and Esmael discrete tasks at the next meeting.
