

Baja Meeting

11/14/19

Final cad

Still missing steering, hubs, knuckles, and few changes to rear end

Meeting tomorrow to work out steering location with frame and drivetrain

Finish CAD

Final report due tomorrow

Final CAD and Bill of Materials next week add material for spares

Everyone

52 will be scrapped so if you need parts go to shop tomorrow

Look at getting control arms and trailing arms made by same company as frame

Heard back about shocks from Elka but they are \$1300 a pair so King is cheaper but taking from 52 would be best.

Fundraising

Check make it out to “

Go fund me being used for plaques
