

NPOI Vacuum Manifold Capstone

# Team Meeting

---

28 September 2021 / 5:30 PM / Eng. Building 2<sup>nd</sup> floor East

## ATTENDEES

Wyatt (Note Taker) / Cydny / Alex

## AGENDA

1. Work on concept evaluation
2. Price out components
3. Work on ppt for next class

## NOTES

- Components are very expensive, the design we were routing for with the long manifold extension off to the side of one FDL will cost too much.
- It's good we found this out now. We can work on our next best design and get ready for the presentation.

## ACTION ITEMS

1. Make CAD of final CV
2. Work on presentation

## NEXT WEEK'S AGENDA

- Get ready for the presentation
