Table 1. Record of meeting.

2:15 pm to 2:30 pm	Present prototype <ul style="list-style-type: none">• Team shows both prototypes of woven stent to Omid• Omid suggests paying more attention to the scaling of the model, specifically the mesh size. A smaller mesh size is preferred in the case that a physician chooses to treat the aneurysm with liquid embolics• It may be helpful to use a thinner wire or a different material like nickel chromium that are easier to work with than Nitinol	BDL
2:30 pm to end	Questions/Answers <ul style="list-style-type: none">• Email Dr. Becker about budget related questions	BDL
