## Mechanical Engineer

---

I am looking to start my career as an engineer and build useful skills that apply both in and out of my profession. I am excited to seek new opportunities and find a position that suits me best.

### Experience

---

2017 - 2022

#### **Retail Sales *Cracker Barrel***

My work consisted of engaging with guests and selling featured products as well as maintaining store cleanliness and restocking various sections of the store. I also unloaded/ unpacked product from truck shipments and managed space in the stockroom for efficient usage. Eventually, after “parring-up” to the highest tier I could in my position, I became a skill trainer and trained new co-workers on their first few days. I have learned how to better work within a team and execute tasks effectively.

2014 – Current

#### **Engineering CAD**

In Coconino High School I was introduced to Autodesk Inventor and learned basic CAD skills in engineering classes that I took for 3 years. NAU taught me SOLIDWORKS basics and I continued to use it throughout my entire college career to create team designs. I have created the overwhelming majority of my teams’ CAD parts and am now very familiar with this platform.

### Education

---

2014-2018

Coconino High School

2018 – 2023

#### **BS ME**

Northern Arizona University

Lumberjack Scholarship

### Skills

---

- SOLIDWORKS
- Task management
- Team-oriented
- Creative
- Quick
